

Your POS shows you the numbers. Cavnar AI **does something** about them.

It reads your Toast, Google, Yelp and Instagram every day, works out what changed and why — then **does the work**: the schedule, the review replies, the marketing, the alert to your phone.

What the AI actually does

Start with one, add more anytime. **COMING SOON** Bar & Alcohol · Waitlist & Reservations

LABOR

Writes next week's schedule

A full-staff schedule built from your sales patterns and labor targets, in one click — and it flags overtime before it lands on payroll.

REVIEWS

Answers every review in your voice

Google and Yelp replies drafted for you — approve and it posts. An urgent one-star review hits your phone the moment it lands.

FOOD COST

Catches margin before it slips

Cost by item, dishes quietly losing money, over-ordering and waste — each one flagged with the reason and what to change.

MARKETING

Runs your marketing from what's selling

Posts, texts and emails written from your own menu and numbers — scheduled, sent, and measured against sales.

Ask Cavnar anything "Why was Saturday slow?" "Which dish is losing money?" "Who's close to overtime?" Answered from your data in seconds — plus customizable alerts to your phone for anything you can't miss.

WHY IT'S DIFFERENT

Not a POS. Not another dashboard.

Toast, MarginEdge and the rest record what happened and hand you a report. Cavnar AI reads the report — and acts on it. It works alongside your POS; it doesn't replace it.

	REPORTS TODAY	CAVNAR AI
Who reads the numbers	You, when there's time	Cavnar AI, every morning
Why a number moved	You work it out	Explained, in plain English
What to do about it	—	A recommendation, ranked by cost
The schedule, the replies, the posts	You write them	Drafted for you — you approve
When something goes wrong	You find out at month-end	An alert on your phone, same day

Running more than one location? Each location gets its own intelligence, with the group rolled up in one view.

PRICING

Simple, per module.

Setup covers the full build — connecting your POS and review platforms, configuring your dashboard, and onboarding your team. Then it runs.

MODULES	SETUP, ONE-TIME	MONTHLY	ANNUAL · 2 MONTHS FREE
1 module	\$750	\$349 /mo	\$3,490 /yr
2 modules	\$1,500	\$649 /mo	\$6,490 /yr
3 modules	\$2,250	\$899 /mo	\$8,990 /yr
Full platform · all 4	\$3,000	\$1,199 /mo	\$11,990 /yr

Setup is paid up front · Your first 30 days of the retainer are free · Annual billing saves two months · Multiple locations? Ask about group pricing.
